

MOBILE BARCODE READER

INSTALLATION GUIDE

The majority of new mobile phones have the possibility of reading mobile barcodes. Find out which models are supported here: www.i-nigma.com/personal/devices.asp

Minimum requirements for your phone:

- Camera
- WAP connection (ability to connect to the mobile internet)
- JAVA support

DOWNLOAD THE BARCODE READER:

Enter your mobile browser and surf to: i-nigma.mobi
(Eventually scroll down the screen)

- Click on "Press here to install reader on your device"
- Verify and download the program

HOW TO READ THE BARCODE

- Open the i-nigma program from your mobile (typically found in the folder "programs").
- Point your mobile phone camera lens in front of the mobile barcode, such that the whole barcode fills up the screen.
- You should now receive some text, a link or contact information on your mobile screen.

Your "mobile scans" are saved in the i-nigma program under "History". You can also invite others to download the program by going to "Invite" and dialing in the mobile number of the receiver: who will receive the link (i-nigma.mobi).
